

# LOCKHOUSE: CAMDEN, LONDON

Barratt West London

## CASE STUDY

On the bank of The Regent's Canal in Camden stands The Lockhouse. It comprises 115 one, two and three-bedroom apartments; many with balconies or terraces which overlook the canal or the split-level landscaped courtyard which forms part of the development.

Developed by Barratt Homes, it provides a new benchmark in metropolitan living with a sleek, elegant façade, large windows and exceptionally stylish, contemporary interiors. Solar roof panels, which move according to the sun's position, will maximise the solar power that supplements the development's electricity supply. There is also a residents' fitness room and a 24-hour, seven day a week, concierge service.

Whilst space restrictions dictated the quantity of equipment that could be supplied, we were still able to offer residents a full body workout through the careful selection of apparatus designed into an intelligent layout.

To achieve this, we fitted a single station multi-gym, as it offers 14 different resistance exercises within a small footprint. This was complemented by an impressive selection of Life Fitness cardiovascular equipment, including treadmill, cross trainer, bike and Concept2 Rower as well as a multi-gym and large wall-mounted plasma showing sport, music and news via free view. The result is an exclusive and highly-functional gym for all Lockhouse residents.
