

OCEANA BOULEVARD: SOUTHAMPTON

Barratt Southampton

CASE STUDY

Oceana Boulevard is located just minutes from the city centre and adjacent to Dockgate 4, overlooking Queens Park and close to Southampton's waterfront.

Southampton is a city that lives and breathes the sea air. Home of ocean sailing and many of the world's most luxurious cruise liners. Southampton has one of the UK's biggest marina developments and its own annual boat show. The city's many outdoor activity centres make it the perfect location for sport enthusiasts with waterside walks, salt air and panoramic views providing relaxed leisure pursuits.

Motive8's task was to provide residents with a light, bright and fully-functional gym in time for when the first residents moved in.

Completed just over 2 years ago, the gym at Oceana Boulevard was both designed and installed by motive8's gym design team. With approximately 500 square feet to work with, we were able to provide a comprehensive cross-section of equipment that would deliver a full body workout for all types of resident. This was achieved by installing, 2 treadmills, 1 cross-trainer, 1 upright bike and 4 pieces of express circuit equipment.

A stretching area along with a wall-mounted LCD television completed the installation.
